Postpartum depression present: ☐
Postpartum contraception discussed: ☐
Quit tobacco during pregnancy: ☐
Remains tobacco free: ☐
Any barriers identified to MAT?
Opioid therapy (specify)
Comments:
Community referrals made:

ONAF instructions for completion

This form serves as the initial notification of a member's pregnancy to the AmeriHealth Caritas Next Bright Start program. Prompt submission from your office allows us to enroll the member into our Bright Start maternity program as early as possible.

- Please fill in the demographics section in its entirety for the first submission.
- Please complete the clinical section in its entirety for each submission by checking the trimester in which the risk or medical or mental health condition was noted.
  - Checked boxes indicate that the condition was identified by the provider's office in that trimester.
  - Unchecked boxes indicate the risk was not identified.
- Please fill in the dates of all visits, including the postpartum visit.
- The ONAF does not need to be filled out by a physician.
- The ONAF can also be used to notify us regarding additional prenatal visits and newly identified risk factors. You do not need to complete the top part of the form each time. Simply add the new office visit(s) or risk factor(s) to the original form and fax it again.
- Please **fax** the ONAF to the Bright Start program as soon as possible after the initial office visit to enable enrollment into our maternity care management program.

The requested clinical information helps AmeriHealth Caritas Next risk-stratify our members to make appropriate referrals into our care coordination program.
